

## Calendar

### Friday, September 8

**3:30 p.m.** DIRECTOR'S COFFEE

BREAK - 2nd Flr X-over

**4:00 p.m.** Joint Experimental Theoretical Physics Seminar - 1 West

Speaker: L. Waters, Los Alamos National Laboratory

Title: Summary of the Hadronic Shower Simulation Workshop, and Further Hadronic Applications

### Monday, September 11

**2:30 p.m.** Particle Astrophysics Seminar

- Curia II

Speaker: C. Gordon, University of Chicago

Title: Broken Isotropy from a Linear Modulation of the Primordial Perturbations

**3:30 p.m.** DIRECTOR'S COFFEE

BREAK - 2nd Flr X-Over

**4:00 p.m.** All Experimenters' Meeting - Curia II

Special Topic: COUPP Bubble Chamber Test

## Einstein's fame endures along with rich earnings

This beer stein is one of many Einstein-themed products on the market. (Click to see entire stein.)

With his genius and his unmistakable appearance, Albert Einstein is an icon of both science and culture. Since his passing Einstein has inspired films, books, and even an opera, "Einstein on the Beach." Not surprisingly, his popularity pays off handsomely.

In its July 3 issue, Forbes Magazine ranked deceased celebrities according to their annual revenues. Einstein came in third, earning \$20 million in 2005 for the Hebrew University of Jerusalem, which inherited his estate.

Approximately \$5 million came from the use of his image, and more royalties came from Disney's line of educational videos and toys, "Baby Einstein," which generated \$400 million in sales last year.

Einstein's earnings followed those of Elvis Presley (\$53 million) and Kurt Cobain (\$50 million) on the list. Rounding out the top five were Andy Warhol (\$16 million) and Marilyn Monroe (\$8 million).

## Fermilab launches community envoy program

Fermilab launched its Community Envoy Program with training about active listening and initiating the first conversation.

In the 1980's, when the Department of Energy proposed Fermilab as a possible site for the Superconducting Super Collider, a local citizens group spearheaded community opposition to the project. "Fermilab is no longer a good neighbor," proclaimed a full-page newspaper advertisement sponsored by CATCH, or Citizens Against the Collider Here. Fermilab doesn't want to make the same mistake twice. That's one reason why Fermilab has instituted a Community Envoy Program. The main goal of the program, however, is to create and maintain meaningful relationships with people in the surrounding communities.

"We have good relationships with our community, and the people who know us generally trust us. But that is not going to do it for what we need for the future," said Judy Jackson, Fermilab's Director of Public Affairs, during the Community Envoy training session on September 5. "We are going to need better relationships with our community than

## Wilson Hall Cafe

### Friday, September 8

- New England Clam Chowder
- Black & Blue Cheese Burger
- Tilapia w/Tortilla Crust
- Swedish Meatballs
- Bistro Chicken & Provolone Paninii
- Assorted Slice Pizza
- Carved Top Round of Beef

### [Upcoming Menu](#)

## Chez Leon

### Wednesday, September 13

#### Lunch

- Lebanese Kabob w/Pita
- Baba Ghannuj
- Hummus
- Tabbouli
- Baklava

### Thursday, September 14

#### Dinner

- Puree Gloria
- Grilled Jumbo Shrimp
- Angel Hair Pasta Diavolo
- Sautéed Spinach w/Bacon
- Profiteroles

## Summer school photo album

HCPSS Students got away from the lab over the weekend and took in the Chicago sites.

The mid-August Hadron Collider Physics Summer School was packed with outings, lectures and discussions. Now you can view the photo book [online](#).

## In the News

### **DOE Press Release, September 7, 2006:** **DOE Announces \$60 Million in Projects to Accelerate Scientific Discovery through Advanced Computing**

WASHINGTON, D.C. — The U.S. Department of Energy's (DOE) Office of Science today announced approximately \$60 million in new awards annually for 30 computational science projects over the next three to five years. The projects are aimed at accelerating research in designing new materials, developing future energy sources, studying global climate change, improving environmental cleanup methods and understanding physics from the tiniest particles to the massive explosions of supernovae.

"Advanced computing is a critical element of President Bush's American Competitiveness Initiative and these projects represent an important path to scientific discovery," DOE Under

ever before."

The program matches up Fermilab employees with key stakeholders, such as local mayors and school superintendents. The envoys will provide information about the lab and become the stakeholders' personal connections to Fermilab. While the envoys will discuss progress on plans for the ILC, the program is intended to keep the community informed about all the lab's projects, scientific goals and achievements. "We don't envision the envoys as a sales force for the ILC," Jackson said. "Don't go out and try to convince everyone. Go out and build a relationship with a couple of people with whom Fermilab badly needs a relationship."
